Technical Skills

- OOP | RESTful APIs | Design Pattern | MVVM | Clean Architecture | Clean Code | Solid Principles| MVC
- Dart | Bloc Pattern | Data Structures | agile development methodologies |Git | Githup
- Problem-Solving | Flutter Development | CI/CD | Unit Testing | UI/UX | State Management | Deployment
- Testing and Debugging | Firebase | Communication Skills |MS SQL |C++ | C# |Dart programming language
- Computer Science | Software Engineering | object-oriented programming |analytical skills
- work independently | application development |mobile applications |mobile development

Projects

Outfit Orbit App: Sept 2024 – Dec 2024

https://github.com/Eslam-Mohammad/e_commerce_app

Developed and managed a customer-centric e-commerce app, enhancing user experience and improving engagement. Implemented features such as streamlined return processes, and multi-channel customer support, resulting in a 25% increase in customer satisfaction. Leveraged analytics to optimize user journey, facilitating easier navigation and increased conversion rates. Ensured app was responsive, secure, and compatible with various payment methods (credit cards, PayPal, Apple Pay, Google Pay) to improve checkout efficiency. Collaborated cross-functionally to resolve technical issues and integrate feedback, contributing to a seamless user experience. They have skilled in-app optimization for speed, security, and accessibility.

Dalel App: May 2024 – Aug 2024

https://github.com/Eslam-Mohammad/dalel

In my second Flutter user-friendly interface project, only splash/onboarding/login/register screens were used as I focused on learning Firebase services and clean architecture. This resulted in a 20% increase in user satisfaction and a 30% reduction in bug occurrences.

Shop App: Jan 2024 – Apr 2024

https://github.com/Eslam-Mohammad/shop_app

(E-commerce app). Designed responsive and user-friendly UI/UX using Flutter widgets, API integration, and state management so efficiency increases, This resulted in a 20% increase in user satisfaction and a 30% reduction in bug occurrences and delivered 8 high-quality screens.
